Certipass in the World

With the support of a specialized extensive network operating in several countries around the world, you could benefit from our international experience and a highly qualified service.

Faster and guaranteed learning

With our support platform for training, Educational Classroom 2.0, you will be able to study and test your knowledge.

Friendly and professional staff

Our Ei-Centers' Staff, Teachers and Examiners are constantly trained for always providing you with an improved service.

More than 800 Ei-Centers in Italy

All our national and international Test Centers meet high quality standards.

DIDASKO – Self Managing

For its multi-channel and multi-language platform, EIPASS is nowadays the largest organization in digital skills certification field.

EIPASS Europe Club

Meeting new people and increasing communication is an essential component of EIPASS world. Accordingly, as well as certifying we give you the chance to interact with other people from all countries.

Certification of marketable

Digital Skills

within both a European and an International context.

The future is always exciting with EIPASS

2005	2006	2007	2008	2009	2010	2011	2012	FUTURE
Established in Italy	Operates in Europe	Has 50 nationwide examination centers	New sector certifications set up	More than 150 institutional partners	DIDASKO Platform	Educational Classroom 2.0 and Social Network	More than 800 examination centers. Foundation of Observatory, CTS, Study and Research Centre.	Continuous the research, new programs development and several Ei-Centers establishment

Certify your digital skills

Here are some reasons why more than 289,000 people have chosen EIPASS to certify their skills.

Passion and care enable us to supply high quality services, which are always updated due to a continuous scientific research.

EXPERIENCE AND QUALITY

We are the first certified ISO: 9001 digital skills certifying authority; all of our Ei-Centers, both national and international, follow an accreditation process requiring a full compliance with high quality standards. The international experience, with approximately 3 million examinations provided, and the highly qualifying services supplied, made Certipass an innovative and successful company.

Ei-Center network

To access EIPASS services you need to go to an Ei-Center and get your Ei-card. You can benefit from learning tools, all accessible in online mode. You can study and prepare for your exam and then test your acquired knowledge: how, when and where you want, EIPASS is always with you!

Resources and programs

Aided by university, school and business world, Certipass gets a complete and scientifically advanced organization which analyzes the training needs and employment trends, daily working to accomplish the programs and services provided. To this end, by ITC experts' involvement all over the world, Certipass has established the International Observatory on digital skills to support lifelong learning policies, the Technical and Scientific Committee and the Study and Research Centre, which are essential resources for the analysis, the development and control of services and quality programs.

Educational Classroom 2.0

A multilingual online platform developed by a team of international experts and designed to meet EIPASS users' different needs. Educational Classroom 2.0 is a technologically advanced and constantly updated tool for training support, which provides users with all resources needed for an effective and in depth study of exam topics, as well as the opportunity to carry out an unlimited number of evaluation tests before an official examination.

DIDASKO Platform

It is an online multi-channel and multi-language platform and our Ei-Centers' main working tool. It allows different activities management, such as administration, user management, individual exams planning, monitoring and enabling of the exams, EIPASS world and ITC regulations related activities updating.

Our success in digital skills certification field originates in passion and care. We supply highest level certifications, programs and services, always being oriented towards a constant teaching research.

This year we decided to make use of all the potential offered by new technologies in order to provide high qualified services, such as Educational Classroom 2.0 and DIDASKO Platform.

To find out more, simply enter the site www.eipass.com: we really stand next to each of our Ei-Center and User; we help the User in making an informed choice, supporting him in every step and allowing him, from the very beginning, to prove and test his skills, both on Computer and mobile devices.

Soon will come the digital TV, a world of opportunities to share and leverage, thus allowing anyone to achieve success!

Domenico

President

Certipass, EIPASS ICT Certifications International distributor

29%

is the sales percentage invested by Certipass in the development and research area, thus starting an innovation dynamic aiming to improve the methods and technological tools.

INNOVATION AND RESEARCH

Before being a technological process, innovation is culture: to constructively evolve for common welfare, it is needful to choose, to design and to pursue innovation policies.

The articulated certification area and all resources dedicated by Certipass to development and research processes are proposing projects for study, development and computer literacy promotion and ITC knowledge sharing. Making research means to be at the forefront in generating and transferring knowledge.

By research we mean, then, to fully understand the quality and limitations of the practices concerned with transmission, teaching and certification of digital skills, to create an innovation dynamic

for methods and teaching tools improvement, always keeping in mind learner's specific needs. In this area, Certipass employs different approaches and methods, choosing the ones appearing, depending on the circumstances, to be more appropriate regarding the nature of the research object. Research projects are carried out with the active collaboration of the network of Institutional Partners.

CERTIPASS IN THE EUROPEAN AND INTERNATIONAL CONTEXT

Universities and agencies all over the world share the aim to combine their proposals with each country's instances, through the strengthened experiences enhancement and the start of projects aimed to make them more effective and productive.

The constant attention to lifelong learning policies as well as non-formal and informal learning enhancement, enables Certipass to become a legitimate subject in an International and European framework, in relation to digital skills spreading, which are now universally considered as fundamental and cross-cutting for both person's development and his correct insertion in economic, civil and cultural environment. Certipass develops programs and projects intended for European and International countries,

complying with each country's regulations, fostering institutional collaboration and taking cultural initiatives aimed to spread a digital literacy resulting to be consistent with technological development of reference.

"International Observatory on digital skills as lifelong learning policies' support"

It was founded to provide an effective support and contribution to digital culture spread as support for Permanent Education policies, through topic recurring and innovative themes analysis. Within International Observatory are engaged the most authoritative professionals chosen from Educational Research and Digital Technology field, with the aim of urging the analysis and comparison of programs and topics on a National and International scale.

Technical and Scientific Committee for digital skills development

It is an assessment and proposition commission of project initiatives which are in line with International Observatory's guidelines, aiming to concretize the studies and research results carried out by the latter.

Study and Research Centre

It is the commission that periodically attends to update and to implement our certification programs, aiming to make them consistent with ITC technology development.

For Ei-Center

Do you remember your excitement when you started organizing courses?
How enthusiastic were you in every detail definition?
Which satisfaction did you welcome your first students with?

Now we can revive and enhance these emotions: a new training way, a new way to certify the acquired skills and Certipass always with you.

To get this we undertake in research, teaching innovation and digital skills standards internationalization. We guarantee an adequate communication and marketing support, integrating your passion with tools using modern technologies, such as Educational Classroom 2.0 and DIDASKO platform.

Certipass will always be at your disposal to assist with continuity and professionalism.

Certipass is
always you

When a company seeks to carve out a role in high content know-how and speedy changing technology sectors, staff expertise and organization rationalization process become success key factors: a project success is always linked to the ability to satisfy users with high quality services provision.

Certipass activity aims to managerial and operational processes standardization; particular attention is devoted to entire development regulation of each provided certification: from training needs analysis to design, from evaluation and implementation to promotion. Certipass is the first ITC Certifications distributor International Board to have UNI EN ISO 9001: 2008 certification, concerning the design and delivery of digital skills certification services.

Learn Faster

Educational Classroom 2.0

A faster guaranteed learning

Live your future as protagonist, complete your education by certifying your skills.

Educational Classroom 2.0 is a multilingual online platform designed and constantly monitored in order to provide a training support effective tool through a communicative and practical learning approach.

EIPASS Junior is a program that aims to the development and certification of digital and basic instrumental skills in children aged between 9 and 13 years.

The program takes as its explicit reference the Elements of Computer Science Syllabus proposed by the Ministry of Education, University and Research for the Compulsory School (2010).

In addition to a conscious and effective computer, operating system and productivity key areas use, the topics covered in this certification include conceptual frameworks (computer science discipline) and programming frameworks (LOGO, StarLogo TNG) related to both Primary School and Lower Secondary School.

Exam modules

Primary school

- Elements of computer science discipline: binary coding, approach to algorithms and flowcharts, representation and problem solving, classification of information
- Archives and artificial memories
- Analysis of hardware components of a computer
- Management of a GUI Operating System: system resources and control panel (basics), use of files and folders
- LOGO Programming

Lower Secondary School

- Elements of Computer Science: algorithm and diagrams design, analysis and decomposition of complex situations, use of logical connectives.
- Computer Best Practice: creation and use of text documents
- Computer Best Practice: creation and use of spreadsheets
- Computer Best Practice: creation of simple multimedia presentations
- StarLogo TNG Programming

Achieve from one of our Ei-Center, an international certification

Your Ei-Card

To access the EIPASS services it's necessary to go to an authorized Ei-Center and getting an Ei-Card, EIPASS Candidate's identification card.

The unique code allows free accessing to Educational Classroom 2.0 services and to examination process needed to get EIPASS certifications.

EIPASS Certificate

At the end of certification process, you will receive in real time, on your e-mail account an EIPASS substitute certificate, for the purposes intended and allowed by law.

Within 30 days from taking the last exam it's possible for you to pick up the original certificate at your Ei-Center.

Verify the authenticity of your certificate

Certipass triggered EIPASS VERIFY, an easy and quick service allowing, through a simple click, to verify the authenticity of Ei-Cards and Certificates issued by our organization at the end of each Certification path.

EIPASS VERIFY is an open tool, especially useful to organizations, public administrations and universities which will be able to verify the authenticity of the certificates presented by users during scores attribution phase for ranking of public competitions, while for Universities, the use of EIPASS VERIFY will be a guarantee for certifications useful for CFU attribution.

What an Ei-Center is

Ei-Centers are the only authorized Centers to distribute EIPASS certification programs. In each Ei-Center it's possible to form and take the required exams to achieve the acquired skills certification.

The Ei-Centers' network is a highly innovative network model, applicable in any local context and that is able to offer immediate development opportunities for all participating educational and training institutions. Certipass, International EIPASS Computer Certifications distributor:

- › Ensures appropriate and effective assistance forms during start-up and throughout the membership period;
- › Programs a constant staff's update, teachers and examiners for each Ei-Center;
- › Develops and provides, for free, communication material required for a proper delivery of services;
- › Promotes and organizes highly professional seminars and conferences characterized by a scientific innovative and experimental content.

Certificates

where and when you want

Easy management of examination sessions

World evolves with amazing speed, this implies a new and huge need for skills allowing you to take full advantage of all power and benefits of new technologies.

By purchasing your Ei-Card you will become part of EIPASS world and it will be possible for you to freely access to training support services, Educational CLASSROOM 2.0, enjoying agreements with major partners and monitoring your progress.

The examination sessions are provided in on-line mode, without any software installation and with full autonomy to meet your needs.

Choose to support your EIPASS examination, please contact an Ei-Center of ours.

DIDASKO® Platform

The multi-channel and multi-lingual DIDASKO platform is simple and intuitive; it doesn't require the installation of software or programs and allows you to share and download manuals, guides and documents that are useful for a better management of Ei-Centers' activities.

DIDASKO platform allows the registration of the users and setting the examination sessions in total autonomy.

DIDASKO platform is winner of the network "Best Practices Confindustria 2012."

Always be online

I made friends and got in touch with new people useful for my profession.

Carlo - Napoli

Knowing how to properly use the computer is an essential requirement for my profession.

Davide - Milano

I chose EIPASS because it's young and innovative, like me!

Federico - Latina

Educational Classroom is a highly innovative support.

Margherita - Ancona

I had the opportunity "to interact with people of other nationalities".

Adrian - Prishtina

I'm going to continue by adding value to my CV and certifying my skills to an advanced level.

Gaia - Roma

I'm very satisfied of the structure and teachers' professionalism of Ei-Center where I took my examination.

Marika-Torino

The perfect combination of training and certification of acquired skills.

Salvatore - Palermo

Certifying my skills allows me to have a prominent position in my school

Antonio - Bari

Certifying my digital skills is a priority for my career.

Gustavo - Benevento

EIPASS4SCHOOL

It's a free program designed for development and spreading of a proper digital culture, intended for all educational Middle-Upper institutions and particularly:

- for students aged between 15 and 17 years, attending the first two classes of triennium being subsequent to Compulsory Education;
- for teachers engaged in training and support activities for a successful and qualification-oriented examination.

For teachers, referees and promoters of the program within its own Institute, Certipass offers the opportunity to achieve at no cost the EIPASS Teacher Certification.

Program membership, which is free for both students and Schools, is within reach of all educational Secondary (high) School institutions.

PROGRESSIVE PEOPLE

What?

"Progressive People" is the area of Certipass free information.

Why?

"Progressive People" is news, multimedia content, articles, stories, pictures, videos, photos, news, snippets, links and quotations.

When?

"Progressive People" is an "open" space and active every day at 360°.

Who?

"Progressive People" is a place for everyone, it is a shared external memory.

Where?

"Progressive People" can be strictly found "on web."

EIPASS EUROPE CLUB

It's an area that, through social networks use, allows all users and operators entering EIPASS world to stay connected with each other in order to share all initiatives and experiences from all over the world, which are logged to explore topics relevant to the following: digital skills and their recognition, events to promote digital culture. EIPASSCLUB Europe is a network based on interchange among young people from the same country or from different geographic areas, not only in terms of mobility but also to pure digital culture.

It's a unique initiative of its kind, being in a position to take advantage of the scientific coordination of the International Observatory (for the Digital Skills development and Policies designed to promote lifelong learning) and the International Study and Research Centre on Digital Skills Development.

EIPASS TV

It's the Online TV on www.eipass.com created to discover and promote educational video and content of social interest.

Everyone can participate in the creation of this young and fast information channel, with a simple and straightforward language, which aims to study in depth public matter topics such as the environment, youth, social inclusion and digital security.
